- Area: Entrance Hall

Design, Supply and Install 25' Aluminum Column Covers for the PCOM Design coordination and install of interior 25' High Steel Rotunda System

- Area: Entrance Hall

Design coordination and install Custom 25' high Curved Steel Rotunda System.

To whom it may concern,

During a recent project I found myself dealing with an owner provided supplier that was creating multiple problems and compromising my project budget and schedule. Without a relationship with this supplier and no alternatives I was without options. Luckily the supplier would not install his own work and I was introduced to Futimis for the install. Maggie and Rick came out to the site and priced not only the install of our custom steel rotunda structure but also other specialties on the project. Futimis quickly submitted samples for selection and were proactive the entire construction process. Near the end of the project we were finding it difficult to meet our deadlines due to the missed delivery dates by other trades and Futimis took on the challenge to get us back on track.

I cannot express my gratitude to Maggie and Rick enough for the level of service and performance they brought to our project. I would highly recommend them to any owner or contractor who is looking for quality workmanship and dedicated team members for future projects.

Sincerely,

John Talmage
